

Introducing the BioCryst SPARK Award

Supporting Pioneering advances in Angioedema Research & Knowledge

BioCryst is proud to announce the launch of the **BioCryst SPARK Award**, a **\$50,000 grant** supporting independent preclinical and/or clinical research that advances the science of angioedema.

The SPARK Award is designed to fuel the next generation of angioedema researchers, investigators with bold ideas, rigorous science, and the drive to translate discovery into meaningful impact for patients.

Who Can Apply

- **Earlier-stage investigators** with an MD, DO, PharmD, PhD, or equivalent terminal degree, typically within five years of terminal training or first independent appointment.
- **Must be affiliated with a U.S. based academic institution, hospital, or recognized research organization** and serve as Principal Investigator for the proposed research. Applications are open to U.S. based investigators only.
- **One application per cycle.** Commercial entities and CROs applying on behalf of investigators are not eligible. Career interruptions may be disclosed and considered in a fair review.

What We Fund

Only **independent preclinical and/or clinical research** related to angioedema. Product-only requests and head-to-head comparisons will not be considered. BioCryst does not influence study design, conduct, analysis, or publication.

Key Dates

- **Applications close: August 15, 2026**
- All materials must be submitted in English by the deadline.

How to Apply

Download the SPARK Award application form and submit your completed application, along with a **current CV (1–5 pages)** and a **one-page research proposal**, to

BioCrystSPARKaward@biocryst.com
